ENERGY STAR® QUALIFIED DEHUMIDIFIERS

KEY SALES MESSAGES:

ENERGY STAR is:

- > A U.S. government-backed symbol of energy efficiency
 - > No sacrifice, same features
-

ENERGY STAR qualified dehumidifiers:

- > Use up to 23% less energy
- > Can save you about \$20 per year (depending on the size you choose and how often you use it)
- > Save about \$200 over 10 years – enough to pay for the dehumidifier

ENERGY STAR qualified dehumidifiers save enough energy to power a refrigerator for 6 months!

TO MAXIMIZE ENERGY SAVINGS, SHARE THESE TIPS WITH YOUR CUSTOMERS:

In addition to **energy performance**, there are many other important operating and convenience features to consider when shopping for dehumidifiers:

- > Dehumidifier Basics
 - > Capacity
 - > Water Removal Options
 - > Placement
 - > Operating Temperature
 - > Relative Humidity (RH)
 - > Energy Factor
-

Useful Tips:

- > If your dehumidifier has a filter, clean it often to eliminate mold or algae growth
- > Clean out the water bucket regularly
- > If there's a moisture setting, use it to select the proper level of dryness to ensure minimum energy consumption
